AI for Good Hackathon | SDG 4: Quality Education

The Hague University of Applied Sciences

Joel Navarro

Art education should be easier to access

Art is all around us, but opportunities to understand it and practise it are not equally available.

01

Limited access

Not every young person can attend art classes or receive individual guidance.

02

Passive learning

Art can feel distant when learning means only reading facts and memorising names.

03

Few ways to practise

Young people need simple ways to observe, experiment and develop their own ideas.

A clear audience — and a realistic pilot

Designed for young people who want to explore art independently, even without prior experience.

CORE AUDIENCE

Young people aged 14–18

Especially students interested in art who have limited access to extracurricular art classes or individual guidance.

PROPOSED FIRST TEST

10–20 students

A small pilot group to test whether lessons, quizzes and creative challenges are understandable and engaging.

10–20 is a proposed testing target, not a claim about the total number of people who need art education.

Discover. Learn. Create.

ArtLab turns art education into a visual, self-paced and hands-on experience.

01

DISCOVER

Explore artists, artworks and six artistic movements.

02

LEARN

Use short lessons, visual examples and interactive quizzes.

03

CREATE

Try creative challenges inspired by what you have learned.

The goal is not to tell users what art means — it is to help them look closely and form their own interpretations.

Six ways into the world of art

A curated starting collection that connects art history with contemporary visual culture.

SURREALISM

Dreams, symbols and the unexpected

IMPRESSIONISM

Light, colour and fleeting moments

CUBISM

Multiple viewpoints and fragmented forms

EXPRESSIONISM

Emotion through colour and form

STREET ART

Public space, identity and messages

DIGITAL ART

Creative expression with digital tools

Plus: lessons on colour theory, composition, visual storytelling and analysing artworks.

LIVE DEMO

One idea.
Three steps.

Show the real application — not just these slides.

1

DISCOVER

Open a movement or artwork.

2

LEARN

Complete one lesson and answer a quiz question.

3

CREATE

Open a challenge and save a journal entry.

Skip any step that is not implemented in your current version.

SDG 4 — Quality Education

Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.

TARGET 4.1 ArtLab provides an additional, self-paced way to explore educational content.

TARGET 4.5 Its free, no-registration approach aims to reduce barriers to art learning.

We aim to support access and inclusion; impact must still be tested with real users.

Accessible by design — honest about limitations

Educational technology should support learners without collecting more data than it needs.

PRIVACY

No account required; progress and journal entries are intended to stay in local browser storage.

INCLUSION

Short explanations, self-paced activities and responsive layouts aim to lower barriers.

ARTWORK RIGHTS

Use reliable sources, verify artwork details and provide image credits.

LIMITATIONS

No proven learning outcomes yet; accessibility and usability need user testing.

Ethical principle: make learning more accessible without pretending one tool works for everyone.

Test the experience before claiming impact

A small pilot can help identify what works and what needs to change.

FUNCTIONALITY

Can users navigate, finish lessons, answer quizzes and save work?

USABILITY

Can a 14–18-year-old understand the interface without help?

LEARNING

Can users explain one concept or recognise a technique after a lesson?

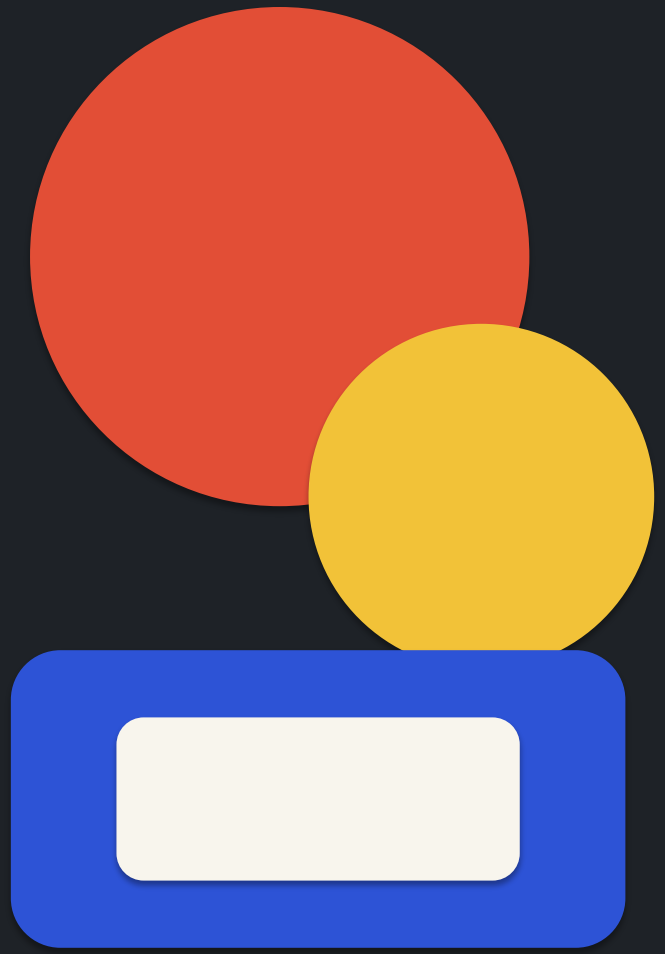

Suggested pilot: 10–20 students. Gather short feedback, observe task completion and improve the prototype.

This is a proposed evaluation plan, not a completed study.

ARTLAB

Learn to see.
Find your style.
Keep creating.

https://artlab-web-app-stey.bolt.host

Art education can be more accessible, visual and hands-on.
